Tails of Gratitude

FROM MARTHA'S DESK

AS I WAS GUIDING A DONOR THROUGH THE EVERYDAY ACTIVITY OF ANIMAL CARE, I was struck by the level of detail essential to our work. Each animal benefits from the notes provided by medical staff, volunteers, and the care team. They note this cat's special diet and this dog's need to go slow; they hold breakfast for the rabbits heading into surgery; and precisely measure milk replacement for orphaned squirrels.

All these details add up to transform the lives of thousands of animals each year. And the humans who fall in love with them. Spreading the humanimality, we helped to create thousands of new families in 2021 through our Adoptions program. As you review the impact of our efforts, understand you are a part of each life changed — animal and human. Thank you for making all of this possible!

for them.

Thank you for creating a community where every animal matters.

Haden gets the love and care he needs to restore his smile

WHEN HADEN ARRIVED, his owner shared with our Intake team that she was unable to care for him and was heartbroken to surrender him. She wanted a better life for Haden, and she put that above her own sadness to let him go. She adopted Haden from SPCA Tampa Bay in 2017, so she knew we could find him a new home.

When Haden arrived at our shelter, it was obvious he needed medical intervention.

There were bright pink areas of inflammation on his skin, leaving him with very little fur. The itchy infection was all over his body and even in his ears. He needed medicated baths and antibiotics. Our team knew it would take a few weeks to get the issues under control and to see Haden's hair come back.

Haden's spirit improved as his health did, and staff and volunteers delighted in his turnaround. Not only was Haden sporting a soft new coat, but he was also smiling! After a few more weeks of treatment, Haden was healthy, playful and ready to go to his new fur-ever home.

Because of donors like you, we are able to provide emergency medical care, food, shelter and time to heal for animals that come to us—whatever their condition.
